

## Ordaining Reality: The Science Behind the Power of Positive Thinking

By Joseph E Donlan

Paperback. Condition: New. 516 pages. Many people believe in the Power of Positive Thinking, but, until now, no one has credibly explained how it works; i. e. , how mere thoughts can tangibly influence future events. To make this link, the book presents a new paradigm of nature and couples it with an explanation of how our right brain hemispheres can tap into the hidden domain of the metaphysical. In support of this, the reader is exposed to the world of physics today (in optional levels of detail), and is then introduced to the problems with this model along with a proposed view that solves these issues. Important to the mission of the book, the new view also supports the premise that the future can only be created with thoughts. In the final analysis, the author brings his readers through the necessary steps to put this knowledge to work and ordain their own realities. Check out the blog for reader feedback. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
