

Creative Ecologies: Where Thinking Is a Proper Job

By John Howkins

Transaction Publishers. Paperback. Book Condition: New. Paperback. 167 pages. Dimensions: 8.9in. x 5.9in. x 0.4in. The main question of our age is how we live our lives. As we struggle with this question, we face others. How do we handle ideas and knowledge, both our own and those of others? What relationship to ideas do we want? Whose ideas do we want to be surrounded by? Where do we want to think? Most choose, or have the choice made for them, according to what family, colleagues, and friends do and say and what we read about, and a more or less rational calculation of the odds. Modern ecology results from the shift in thinking generated by quantum physics and systems theory, from the old view based on reductionism, mechanics, and fixed quantities to a new view based on holistic systems where qualities are contingent on the observer and on each other. This perception changes how people treat ideas and facts, certainties and uncertainties, and affects both art and science. Worldwide it is part of the process of understanding the current crisis in the environment, and the balance of economy, creativity, and control required in our response. The book's starting point is...

Reviews

This type of publication is almost everything and taught me to hunting ahead plus more. It is written in easy terms rather than difficult to understand. Your way of life period will likely be transformed once you comprehensively look at this ebook.

-- Gladyce Reinger

Definitely one of the best books we have at any time gone through. It is actually filled with wisdom and knowledge I am quickly getting a delight of studying a published book.
