Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Continuous Time Stopping Games With Monotone Reward Structures The existing literature on continuous time non-zero - sum stopping games mentioned above, with the exception of Morimoto uses stochastic environments that have the Markov property. Morimoto [1986] considers cyclic stopping games. The purpose of this paper is to provide an existence theorem for Nash equilibria for a class of non-zero-sum non-cyclic stopping games in a non-markov environment. We basically extend the discrete time analysis of Mamer [1987] to a continuous time setting. Some properties of a symmetric Nash equilibrium are also characterized. The rest of this paper is organized as follows. In Section 2 we formulate an N - person continuous time non-zero - sum stopping game. Reward processes are optional processes that may be unbounded and can take the value -  $\infty$  at  $t = 0$ . A martingale approach is adopted in Section 3 to show the existence of optimal stopping policies of players under fairly general conditions. The existence of a Nash equilibrium in games with monotone payoff structures is proved in Section 4 by using Tarski's lattice theoretic fixed point theorem. We show in the same section that, for a symmetric stopping game, there always exists a symmetric equilibrium when the reward processes satisfy a monotone condition. Moreover, a symmetric equilibrium. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be...
