It was found that much better results could be obtained by introducing all the air at one place in a tunnel, and the flues underneath the tracks were cold bricked up. It seemed that with a tender clay there was much less loss when the dry hot air, as it came from the duct, came in contact with the driest brick first. It could not injure these, but did absorb a little moisture, and absorbing a little more, as it passed on, by the time it struck the really tender brick half way up the tunnel, it was sufficient moisture to let its zinc lining perish considerably. As a result these bricks were not so strong but were strong enough to prepare them for the next stage: a little further on. Then the air was allowed to flow up the tunnel also....

Reviews

These kinds of book is every thing and helped me hunting forward plus more. It is probably the most remarkable book we have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Everett Stanton**

A whole new e book with an all new point of view. It is one of the most incredible book i actually have go through. I am easily could possibly get a enjoyment of reading through a written book.
