The Third Binational USA-USSR Symposium titled Laser Optics of Condensed Matter was held in Leningrad 1 June - 5 June 1987. This volume contains the full text of 64 papers presented at (or prepared for) the Symposium in both plenary and poster sessions. This Symposium reestablished the very productive series of Light Scattering Binational Symposia which were initiated in Moscow in 1975. Unfortunately there was an eight-year hiatus following the Second Symposium in New York (1979). This interval, caused by serious chilling of the climate of USA-USSR collaboration, deprived the active scientists on both sides of the opportunity to meet and interact in the active format of a conference. During this eight year interval there has been very rapid and intense development of scientific activity in the general area of laser optics phenomena. The development of ultrafast laser sources has permitted rapid advances in time resolved spectroscopy and ultrafast processes; the field of optical bistability and strong nonlinearity became a hot topic; and intense work is now underway to clarify ideas of photon...
